

SUBASH V

Software Developer

Krishnagiri, Tamil Nadu | 9361668286 | subashv2003.10@gmail.com

Linkedin | Portfolio | Github

Career Objective

Software Developer with hands-on experience building responsive, performance-optimized web applications using React.js. Completed a 7-month internship as a Software Developer and built independent projects spanning AI-powered applications and full-stack web platforms, focusing on load-time optimizations and improving frontend performance. Strong foundation in OOPs and database management, with a focus on writing clean, maintainable, user-focused code.

Education

<i>Sri Shakthi Institute of Engineering and Technology</i>	<i>Coimbatore</i>
B.Tech, Information Technology First Class	2025
<i>Sri VRV Matric Higher Secondary School</i>	<i>Tirupattur</i>
Higher Secondary (Class XII) — 86%	2021
Secondary School (Class X) — 82%	2019

Technical Skills

Frontend: HTML, CSS, Tailwind CSS, React.js, Redux

Backend: Node.js, Express.js

Languages: JavaScript, Java

Concepts: Object-Oriented Programming (OOPs), REST APIs, Performance Optimization

Databases: MySQL, MongoDB

Tools: VS Code, Eclipse, Postman, MySQL Workbench, Git, GitHub, Vercel, Jira, Google Stitch

Projects

GenX-AI — Text-Based LLM Application | *HTML, CSS, React.js, LLM API*

Live Demo: gen-x-ai.vercel.app

- Built a conversational AI web application capable of answering questions, generating text, translating, and summarizing content using an LLM API.
- Improved front-end performance by reducing Largest Contentful Paint (LCP) from 1000ms to 400ms (60% reduction) through rendering and load-time optimizations.
- Designed a responsive, intuitive chat interface for seamless user interaction with AI-generated responses.

MealMate — Food Ordering Web Application | *HTML, CSS, JavaScript, React.js, Redux*

Live Demo: meal-mate-vercel.app

- Developed a food ordering platform enabling users to search restaurants and browse detailed menus.
- Implemented add-to-cart functionality, allowing users to select, review, and manage items before checkout.
- Built a responsive UI to ensure smooth navigation across restaurant listings and menu pages.

Online Shopping Management System (Java Console Application) | *Java, JDBC, MySQL, Eclipse IDE*

- Designed and implemented role-specific workflows using polymorphism and interfaces, enabling clear separation of Admin and Customer operations.
- Developed core modules including user authentication, product catalog management, cart and order processing, and session handling.
- Integrated MySQL using JDBC with prepared statements and result set handling to ensure secure and reliable database interactions.

Internship Experience

Software Developer Intern | *Aviontive*

Jul 2025 – Jan 2026

- Collaborated with the development team to build and maintain web application features using React.js, JavaScript, and REST APIs.
- Assisted in debugging and testing UI components, improving application stability and overall user experience.
- Worked with MySQL and MongoDB for data management tasks under the guidance of senior developers.
- Participated in code reviews and daily stand-ups, gaining practical exposure to Agile development workflows.
